Dear Derek

The University of Bristol appointed Global MSC Security in 2009 to carry out a full audit of the University's CCTV systems throughout our many campus sites, which included proving a full list of hardware and its compliance with the data protection act as well as providing recommendations about how to maintain and manage the 250 cameras we own going forward, which included writing a pan-university CCTV strategy.

As a result of their excellent work, they have since been selected to project manage the upgrade of our existing CCTV systems to include interfacing with access control and intruder systems as well as produce a specification for our proposed new control room, which will be going out to tender shortly. They have advised us in many security aspects and are being used to measure the effectiveness of our security maintenance service provider, etc.

MSC have expert technical knowledge throughout the vast range of CCTV products and provide a professional, comprehensive and high quality, responsive service.

I would have no hesitation in recommending them to other potential clients.

Yours sincerely

Jerry Woods
