To Whom It May Concern,

Global MSC Security

The London Borough of Sutton and the Metropolitan Police Service jointly own and manage the Public Space CCTV system operating within the London Borough of Sutton. The service is in many ways unique nationally as it incorporates a joint Police and Council control room function that provides very considerable operational effectiveness and cost efficiency.

In April 2013 the London Borough of Sutton and Metropolitan Police Service established a project to refresh the entire CCTV system, with the aim of exploring leading edge wireless/IP and high definition camera technology, and after a competitive procurement process commissioned Global MSC to provide technical and management consultancy.

Since our initial collaboration I have been consistently impressed with the level of professionalism, knowledge and service generally offered by Derek Maltby and his team. I have come to realise that Global MSC have a growing reputation within the security industry and are favourably known to Security Integrators and professionals alike.

I would not hesitate to recommend Global MSC and Derek Maltby to prospective clients and would be happy to provide more detailed information about the work they have undertaken for me, or a formal reference if necessary.

Yours faithfully,

Glenn Phillips MCM
Safer Sutton Partnership Manager
